

ARCLEND

From fog to clarity — in one platform.

Complete Brand Guidelines

VERSION 1.3 · SEPTEMBER 2026 · PREPARED FOR INTERNAL & PARTNER USE

What's inside

A complete, production-ready reference for using the ArcLend brand consistently across every surface — logo, color, type, icons, product UI, motion, and applications.

About, mission, vision

The name tells the story visually — ARC is the hazy, uncertain state customers arrive in; LEND is where they go with us. Every product, word, and pixel serves that transformation.

About the brand

ArcLend was founded on a single observation: the lending industry in India is sitting on decades of manual processes, fragmented systems, and reactive risk management — while the technology to fix all of it already exists. "ARC" represents the hazy, uncertain state customers arrive in — gray, blurred, confused. "LEND" represents where they go with us — sharp, clear, resolved, and in control.

Mission

To give every bank and NBFC in India the clarity, speed, and intelligence they need to make better lending decisions — from loan origination and credit scoring to collections, fraud prevention, and audit management — through one unified, AI-powered platform.

Vision

A future where no creditworthy borrower is turned away because of slow systems, and no lender loses money because of information they already had access to. ArcLend will be the operating system of the Indian lending ecosystem.

BEFORE / AFTER ARCLEND

BEFORE	AFTER
Fragmented systems, unclear risk, manual workflows, slow decisions, compliance risk, mounting NPAs	Automated origination, real-time credit scoring, intelligent collections, fraud prevention, full audit trail

BRAND TAGLINE

"From fog to clarity — in one platform."

Supporting line: Clarity for the lending ecosystem.

Values, positioning & audience

A structured view of what's already documented in the mission and voice pillars — presented here as explicit brand-foundation reference points.

CORE VALUES

Clarity

Cut through fog with precise, actionable information — never noise dressed as insight.

Precision

Every claim, every pixel, earns its place. No vague superlatives, no filler.

Empathy

Built for people under pressure, not just processes. Lead with their pain.

Trust

Security, auditability, and transparency by design — not bolted on after.

Momentum

Always moving lenders from uncertainty to resolution — never standing still.

POSITIONING STATEMENT

"For banks and NBFCs drowning in fragmented lending workflows, ArcLend is the unified AI-powered platform that turns fog into clarity — from origination to collections — because every rupee lent deserves a smarter, safer, faster decision."

TARGET AUDIENCE

Credit risk officers, loan operations leads, and compliance/audit teams inside Indian banks and NBFCs, plus the CXOs who own lending P&L. B2B, mid-to-large regulated lenders modernizing legacy, fragmented lending stacks.

BRAND PERSONALITY

Sharp

Empathetic

Precise

Visionary

Trustworthy

Direct

Four pillars

Sharp, not jargony

Speak with the confidence of engineers and the clarity of business people. No buzzwords, no fluff. Every sentence earns its place.

Precise, not cold

Numbers and outcomes anchor everything, but built for humans under pressure. One strong, specific claim beats three vague ones.

Empathetic, not salesy

Understand the chaos inside lending ops. Lead with their pain, product second. Never talk down to customers.

Visionary, not vague

Big claims about reshaping lending, always grounded in a specific, demonstrable capability.

WRITE LIKE THIS / AVOID THIS

DO WRITE LIKE THIS

“Reduce NPA rates by up to 34%.”

“Your compliance team, always audit-ready.”

“Built for Banks and NBFCs, not adapted for them.”

“From fog to clarity — in one platform.”

AVOID THIS

“Next-gen AI-powered disruptive fintech”

“Holistic end-to-end synergistic solutions”

“We leverage cutting-edge technology”

“Best-in-class, world-class, game-changing”

TONE BY CHANNEL

CHANNEL	TONE	SAMPLE
Sales & investor pitch	Bold, outcome-led, data-backed.	“India's lending operations lose ₹3,200 Cr annually to preventable fraud. ArcLend catches 94% of fraud signals at the application stage.”
Product UI & in-app	Clear, instructional, calm.	“Your credit decision is ready. Review the reason codes before approving.”
Support & onboarding	Warm, reassuring, human.	“The bureau check is taking a little longer than usual. No action needed — we'll notify you.”
Email — outreach	Respectful, brief, specific.	“If 40% of underwriting is still manual document verification, that's ~120 analyst-hours a month.”

Terminology & conventions

PREFERRED TERMINOLOGY

AVOID	USE INSTEAD	WHY
“Shadow bank”	“NBFC”	Use the regulator-recognized term, not a media shorthand.
“Lending space”	“Lending ecosystem”	Matches the tagline's own language.
“Loan verdict”	“Credit decision”	Neutral, professional register.
“Borrower-user”	“Applicant” / “customer”	Plain, human terms.
“Arc Lend” / “ARC Lend”	“ArcLend”	One word, capital A and L — always.

CAPITALIZATION & PUNCTUATION

CONVENTIONS

Product name: **ArcLend** — one word, always

Feature names in Title Case; UI labels in Sentence case

No ALL CAPS in body copy — reserved for eyebrow labels only

Oxford comma, yes. Em dash for asides — like this.

Currency: ₹ prefixed, Indian comma grouping (₹4,50,000)

SAMPLE CTAS

“See it resolve.”

“Start your clarity audit.”

“Talk to a specialist.”

“Get your TAT benchmark.”

The mark

A single horizontal logotype set in Dune Rise — geometric, minimal, razor-clean letterforms at uniform ~0.12–0.14em tracking across every letter pair. No icon or emblem in the primary lockup; the wordmark *is* the mark. The symbol lives in color, not shape: "ARC" renders in Steel (uncertainty), "LEND" ignites in Arc Orange (resolution).

The wordmark "ARC LEND" is displayed in a clean, geometric sans-serif typeface. "ARC" is in a light gray color, and "LEND" is in a vibrant orange color. The letters are spaced evenly, creating a balanced and modern look.

FOUR APPROVED TWO-TONE VARIATIONS

The wordmark "ARC LEND" is shown on a dark gray background. "ARC" is in light gray, and "LEND" is in orange.

Dark background

The wordmark "ARC LEND" is shown on a light gray background. "ARC" is in light gray, and "LEND" is in orange.

Light background

The wordmark "ARC LEND" is shown on an orange background. "ARC" is in light gray, and "LEND" is in a darker shade of orange.

Reversed on orange

The wordmark "ARC LEND" is shown on a pale gray background. "ARC" is in light gray, and "LEND" is in orange.

Reversed on pale

REAL PRODUCTION ASSET (VERIFIED)

The wordmark "ARC LEND" is shown on a dark gray background. "ARC" is in light gray, and "LEND" is in orange.

Checked pixel-for-pixel against the documented Arc Orange and Steel hex values — exact match on both colors. The production background sample reads #23282C, close to but distinct from Charcoal / Midnight — see Roadmap, item 3.

Short-form, single-ink & usage rules

SHORT-FORM LOCKUP — "AL"

Below the ~120px minimum — favicons, app icons, social avatars, single-ink print — the wordmark shortens to its initials rather than switching to an unrelated symbol, so it stays recognizably the same mark at any size.

SINGLE-INK VARIANTS

CLEAR SPACE & MINIMUM SIZE

1× "A"

Clear space on all four sides, equal to the width of the letter "A"

120px

Minimum digital width for the two-tone wordmark

30mm

Minimum print width for the two-tone wordmark

LOGO DON'TS

- ✗ Never recolor the orange to another hue
- ✗ Never use one color for both ARC and LEND
- ✗ Never stretch, skew, rotate, or distort
- ✗ Never place on busy or photographic backgrounds
- ✗ Never apply drop shadows, glows, or outlines
- ✗ Never apply Dune Rise to any other text element

Palette

Muted steel tones carry structure and trust; orange carries energy and resolution. Orange is the rarest, most powerful asset in the system — use it sparingly (roughly 15–20% of any layout) so it always feels earned.

PRIMARY

 Arc Orange #E8611F · RGB 232/97/31 · CMYK 0/58/87/9 The brand's defining color. CTAs, active states, key metrics. Max ~20% of any layout.	 Charcoal #2D3138 · RGB 45/49/56 · CMYK 20/12/0/78 Dominant dark background for premium and dark-mode contexts.	 Midnight #1A1C20 · RGB 26/28/32 · CMYK 19/13/0/87 Deepest dark canvas — nested panels, back covers.
---	---	---

SECONDARY / NEUTRAL

 Slate #8B8F97 · RGB 139/143/151 · CMYK 8/5/0/41 Secondary labels, muted UI. Fails WCAG AA for small body text on white.	 Steel #C4C6CA · RGB 196/198/202 · CMYK 3/2/0/21 Subtle UI; the ARC wordmark color on dark backgrounds.	 Pale #F4F4F5 · RGB 244/244/245 · CMYK 0/0/0/4 Light-surface backgrounds, card fills.
---	---	--

FUNCTIONAL / STATUS COLORS

 Approved #18B876 · RGB 24/184/118 · CMYK 87/0/36/28 Success, approval	 Processing #2A8FE8 · RGB 42/143/232 · CMYK 82/38/0/9 In-review, informational	 Watchlist #F5A623 · RGB 245/166/35 · CMYK 0/32/86/4 Warning, flagged / medium-risk
 Rejected #E84040 · RGB 232/64/64 · CMYK 0/72/72/9 Risk, denial, error states		

Pairings & accessibility

APPROVED / AVOID PAIRINGS

APPROVED

Arc Orange on Charcoal

White text on Charcoal

White text on Arc Orange (logo / impact headlines only)

Arc Orange text on White (links, callouts)

AVOID

~~Arc Orange on Arc Orange~~

~~Slate text on White (fails WCAG AA)~~

~~Steel text on Pale (insufficient contrast)~~

~~Red on Orange (status must never mix with primary)~~

CONTRAST REQUIREMENT

4.5:1

Minimum contrast for all body text (WCAG AA)

3:1

Minimum contrast for all large display text

USAGE RULE

Never place orange on orange, or use more than two colors together in a single layout element. Let white space do the work.

Semantic & UI tokens

For digital product work, the primary/secondary/status palette maps to semantic roles so engineers and designers reference one consistent name regardless of surface.

 Success #18B876 Confirmations, approvals, positive states	 Warning #F5A623 Caution, flagged / medium-risk states	 Error #E84040 Failures, denials, destructive actions
 Info #2A8FE8 Informational, in-progress states	 Background (light) #FFFFFF Default light-mode canvas	 Background (dark) #1A1C20 Default dark-mode canvas
 Surface (light) #F4F4F5 Cards, panels, raised elements on light	 Surface (dark) #2D3138 Cards, panels, raised elements on dark	 Border (light) #EAEAE8 Default hairline separators, light mode
 Border (dark) rgba(244, 244, 245, .09) Default hairline separators, dark mode	 Disabled #8B8F97 @ 40% Disabled controls, inactive text/icons	

Type system

Four typefaces, each with one exclusive job. Dune Rise never leaves the logo; JetBrains Mono is reserved strictly for numbers.

TYPE SCALE

STYLE	SIZE	WEIGHT / TRACKING
Display / Hero	48–64pt slides • 32–40pt web	Bold • –0.02em
Section / Page title	24–32pt	Bold • –0.01em
Sub-heading	16–18pt	Regular
Body text	12–14pt	Regular • line-height 1.7
Label / eyebrow	9–11pt	Bold • all-caps • 0.18em
Data / metric	12–36pt	JetBrains Mono

Heading hierarchy & fallbacks

A concrete H1–H6 scale for web and product surfaces, mapped from the type scale on the previous page.

LEVEL	SIZE	WEIGHT	TYPEFACE	USE
H1	40px	700	Space Grotesk	Page / hero titles
H2	32px	700	Space Grotesk	Section titles
H3	26px	700	Space Grotesk	Sub-section titles
H4	20px	600	Space Grotesk	Card / block headers
H5	16px	600	Inter	Minor headers, emphasized labels
H6	13px	700	Inter	Eyebrow / overline — uppercase, 0.18em tracking
Body	14px	400	Inter	Paragraph text — line-height 1.7
Caption	12px	400	Inter	Captions, helper text — line-height 1.4

FALLBACK STACKS

ROLE	STACK
Display / headings	Space Grotesk, Helvetica Neue, Arial, sans-serif
Body / UI	Inter, -apple-system, Helvetica Neue, Arial, sans-serif
Numerical / data	JetBrains Mono, SF Mono, Consolas, monospace
Logo wordmark	Dune Rise, Space Grotesk, Arial, sans-serif

Icons, illustration, photography & graphics

One consistent visual grammar carries across every graphic surface — icons, illustration, charts, and photography all read as the same brand.

ICON STYLE

Outline only, 1.5px stroke, rounded caps, no fill — see Iconography for the full system.

ILLUSTRATION STYLE

Geometric and flat — rectangles and circles only, no organic shapes or blobs. Two-color maximum per illustration (gray for structure, Arc Orange as the accent for the focal element). No gradients, no textures, no drop shadows — the same restraint as icons and charts, so all graphic elements read as one system.

PHOTOGRAPHY DIRECTION

Convey clarity, precision, and transformation — never chaos or generic corporate stock. Clean, directional lighting with soft shadows; cooler tones for "before" contexts, warmer/sharper for "after." Real financial professionals in authentic environments, diverse in age, gender, and region — no suits-and-handshakes clichés. Product shots: one workflow at a time, on dark or neutral device mockups, orange highlights on key data points.

GRAPHIC PRINCIPLES

0

Gradients — never used, anywhere

0

Drop shadows — color signals depth instead

2

Max colors per graphic element

Icon system

Phosphor / Lucide as the base construction language — outline only, 1.5px stroke, rounded caps, no fill. Never mix icon libraries in one product, document, or presentation.

CORE MODULE ICONS — WITH THE "RESOLUTION DOT"

Each of the eight core product icons carries one small solid Arc Orange dot marking its "point of resolution" — a deliberate, brand-specific device so the set reads as ArcLend's own.

EXTENDED UI ICON SET (V1.3)

SIZING & COLOR

16px

Inline UI / labels

20px

Buttons / navigation

24px

Max for feature callouts

The 8pt grid

Every spacing decision in the system reduces to multiples of 8px. This keeps rhythm consistent across web, product, and print.

	4px	Micro — icon gaps, tag padding
	8px	XS — inline element gaps
	16px	SM — card padding, row spacing
	24px	MD — section inner padding
	40px	LG — between content sections
	64px	XL — page hero breathing room

BORDER RADIUS

ELEVATION

Flat by default. 1px border as the default separator. No drop shadows anywhere — color signals depth, never a blurred background.

Data & actions

Extends the token system into dense, data-heavy in-product screens. Built entirely from existing colors, type and spacing — no new tokens introduced.

Retry

Charts & graphics

Geometric, precise, minimal. Two-color maximum per graphic element — gray for structure, orange as the accent for active or highlighted states only. No gradients, full stop.

RULES

CHART TYPE	RULE
Bar	Primary bars Arc Orange, comparison bars Steel. Always show the value label.
Pie / donut	Part-to-whole only, 4 segments max. Prefer donut (60% inner radius). Never for trends over time.
Line	Primary line Arc Orange at 2px, 15% opacity fill beneath. Y-axis starts at zero unless annotated.

Always include axis labels; remove chart borders; show data labels on the primary series only — a chart should be readable at a glance, with no legend required.

The resolve

For anything larger than a UI micro-interaction — video intros, app loading splashes, the closing beat of an animated ad — use one specified signature animation instead of improvising.

SPECIFICATION

Duration	900ms
Easing	cubic-bezier(0.16, 1, 0.3, 1)
Properties	Opacity, position, and color — never scale or rotation
Direction	Always ends on the resolved orange state — never reverses

Functional UI micro-interactions use a simpler 200ms ease-out, animating opacity and position only. Respect prefers-reduced-motion everywhere.

Applications

A sample of the system applied to real collateral — the same tokens, the same rules, every time.

Letterhead, presentation & product

These are illustrative starting points, not final production files — a marketing or product designer should adapt them per real deliverable.

What's in the package

Every deliverable referenced in this document ships together in `ArcLend-Brand-Assets.zip`, organized by folder so engineering, marketing, and design can each find what they need without hunting.

FOLDER	CONTENTS	NOTES
01_Logos/SVG	arclend-wordmark-twotone.svg, -charcoal.svg, -white.svg, -orange.svg, al-mark.svg	Outlined vector masters, real font outlines, uniform tracking
02_Logos/PNG	arclend-wordmark.png, al-icon.png	Verified real production exports
03_Fonts	Dune_Rise.otf, Dune_Rise.ttf, dune-rise.woff2	SIL OFL 1.1 — see LICENSES.md
04_Color-Tokens	arclend-tokens.css, arclend-tokens.json	Drop-in design tokens
05_Icons/SVG	18 icon files — 8 core + 10 extended UI icons	Outline style, resolution-dot variants included
06_Motion	arclend-motion-asset.html, arclend-motion.mp4, arclend-motion.gif	Canonical steel→orange resolve animation
07_Guidelines	ArcLend-Brand-Guidelines.pdf, ArcLend-Brand-Guidelines.pptx	This document, in both formats
08_Legal	ArcLend-Trademark-Specimen-Packet.pdf, LICENSES.md	Non-legal-advice prep material + font licensing notes

LICENSING

Dune Rise is licensed under the SIL Open Font License 1.1 (© 2021 Fontswan) — free to embed, bundle, and self-host. Before redistributing the font files outside this package, confirm you carry forward the license's own text alongside them, per OFL's terms. JetBrains Mono, used for illustrative type specimens only, is separately OFL-licensed by its own foundry.

What's intentionally unresolved

These items require specialists or confirmation outside a design pass, and are logged here rather than guessed at.

- 1 **Wordmark customization.** A modified terminal or merged ligature where "C" meets "L" would make the lockup harder to imitate. A kerning-only version was tried in v1.3 and reverted — it broke the confirmed brand rule that every letter pair uses the same uniform tracking. Needs a type designer editing the actual glyph outlines, not a spacing trick.

- 2 **Trademark filing.** Registering the finished lockup protects its use in commerce independent of the font's license. A specimen packet (mark description, vector masters, usage exhibits) has been prepared for counsel; the filing itself still needs IP counsel and a clearance search.

- 3 **Background hex reconciliation.** Production logo exports use a dark background of #23282C, distinct from both documented dark values (Charcoal #2D3138, Midnight #1A1C20). Needs confirmation from whoever generates production exports on which value is canonical.

SOURCE & VERSION

Consolidated from ArcLend_Brand_Kit.pdf and ArcLend Brand Guidelines.pdf, extended through v1.3 with real production-asset verification, an expanded icon and product-UI system, a canonical motion export, clean vector logo masters, and trademark specimen prep. Full rationale for every decision lives in `brand-guidelines.md` and `brand-recommendations.md`.
